

Quality

Customer Satisfaction
Every CNC machine shop talks about quality, but John Prosock Machine understands that quality must be measured in customer satisfaction.

Meet needs...
Exceed expectations
Owner John Prosock says, "Customer loyalty and God's blessing have brought us to where we are today in our current facility. Each job receives priority status and detailed attention. You will never feel like just another customer with us."

John Prosock Machine is a CNC machine shop that has been in business since 1982 with superior quality and service as its benchmarks. The company has built meaningful customer relationships resulting in hard-earned customer loyalty. John Prosock Machine has been built literally from the ground up, starting in the 15'x20' basement of John Prosock's first home. Today, John Prosock Machine is situated on 5 acres in Quakertown, Pennsylvania.

- High quality CNC mill and lathe machining
- Quick turnaround quotes
- Tight tolerances over large work pieces
- Low pricing on short runs
- "Hands on" customer service, no matter the size of the order
- User friendly web interface
- ISO 9001:2000 Certified
- Product guarantee

"Hard-earned Customer

Loyalty"

"As I approach my work, I always look to do it at 100% of my potential."
Tiffany Rafferty

ISO 9001:2000 Certified
John Prosock Machine has achieved the ISO 9001:2000 certification because of its employees' outstanding commitment to product quality. Quality...for every operation, regardless of complexity...for every order, no matter the size.

"I just wanted to thank everyone at Prosock who was responsible for getting out our hot order this weekend. With your services, we were able to meet the needs of one of our primary accounts. All of us here appreciate the extra effort."

Mary Ann , SKF

"I like being able to make quality parts for customers and have a part in helping them be successful."
Joshua Whiteman

John Prosock Machine
Guarantees Customer Satisfaction

Service from a Professional and Dedicated Staff

Our team includes some of the most skilled and talented professionals in the industry. We have over 30 staff committed to providing you with the best products possible.

Prototype Services

We know you need quick turnaround and exact replication of your drawings into finished parts. We will analyze your drawing and specifications, listen to your ideas, then develop a prototype perfect for you.
